

HUGO CORREIA

Software Engineering Student

ABOUT ME

I am currently studying computer engineering at the university of aveiro. I am equipped with excellent communication skills in both English and Portuguese, and have experience in team management and problem solving. My areas of interest are Full Stack Development, Data Engineering and Software Architectures.

EDUCATION

Secondary School

Science and Technology - Escola Secundária José Estevão, Aveiro
Sep 2018 - Jul 2021

Average: 18.2/20

BSc. in Computer Science Avg: 15.3/20

University of Aveiro
Oct 2020 - Jun 2024

Bsc. Final Project 19/20

INTRODUCTION TO SOFTWARE ENGINEERING 17/20

COMPUTER AND ORGANIZATIONAL SECURITY 19/20

Master in Computer Science Avg: 17.3/20

University of Aveiro
Sep 2024 - Present

INFORMATION VISUALIZATION 19/20

PRE-DISSERTATION 18/20

ADVANCED ALGORITHMS 18/20

SOFT SKILLS

Team Management

Creativity

Problem-solving

Adaptability

Critical Thinking

Leadership

LANGUAGE

• Portuguese

• English

Rua Fernando Pessoa, Lote 26,
Eixo-Aveiro, Portugal

SKILLS

Programming Languages

TypeScript/Javascript, Java,
Python, Ruby, C, CPP, Kotlin

Databases

SQL, MongoDB, Redis, Cassandra,
Neo4j, MariaDB, Postgres, MinIO

Cloud Computing

AWS, Azure, Google Cloud

Web Development

JQuery, ShadCn, CSS, NextJS, HTML,
AngularJS, TailwindCSS, Astro, React,
Tanstack (Table, Query, Router)

Frameworks and Related

SpringBoot, Flask, FastAPI,
TensorFlow, Numpy, OpenCV,
Kafka, RabbitMQ

EXPERIENCE

Research Grant

SET 2024 - Present

Institute of Electronics and Informatics Engineering of Aveiro - IEETA

- **(Current)** Designing and developing BEHOLD, a plugin-based framework for gaze-aware evaluation of interactive ecosystems. The system provides a device-agnostic architecture supporting multiple eye tracking hardware platforms, real-time multimodal synchronization via Lab Streaming Layer (LSL), and integrated data collection, analysis, and visualization workflows for distributed deployment scenarios.
- Designing and Developing a modular framework to support research on advanced medical imaging technologies. Integration of a multi-disciplinary team, including cardiologists, computer science engineers, and biomechanical engineers

HCI International 2025 Paper (Published) FEV 2025 - Present

Title: Open-Source Tools are Just the Start: A Human-Centred Approach to Supporting Clinical Workflows for Left Ventricular CT Analysis

Authors: Hugo Correia, Bernardo Marques, Samuel Silva

Year: 2025

- As an author and researcher, I am currently developing a paper for HCI International 2025, focusing on the integration of OHIF Viewer in clinical workflows for left-ventricular CT image analysis. This work follows a human-centered approach, identifying key usability issues and proposing improvements to enhance accessibility and efficiency in medical imaging.

Núcleo de Estudantes de Informática - NEI 2021 - Present

Coordinator (Current) - Head of Recreation - Head of Sports

- As Head of Recreation/Head of Sports, I lead diverse teams and manage the organization of leisure and sports events. This role has strengthened my leadership, team coordination, and logistical planning skills, ensuring the successful execution of high-profile university events.
